CATALOGUE

“L” before the Herd Book number indicates Pedigree Luig Male. “P” indicates Pedigree Luig Female. “A” indicates Appendix “A” Female. “B” indicates Appendix “B” Female. [P] After family name indicates: the animal is polled. “P/12345*” indicates dam classified, and L/12345# indicates that the sire has passed a breed inspection. All bulls entered have been inspected by the Fieldsman. “SV” after the name indicates that the animal has been sire verified by DNA hair sample.

CONDITIONS OF ENTRY

1. The Sale is conducted under the “General Conditions of Sale” which are exhibited in the Market and in accordance with the Regulations as approved by The Luig Cattle Society Limited.
2. Please note: Stock will be sold as they appear in the ring. Any prospective buyer wishing to purchase one of a pair must consult the vendor prior to them entering the ring to see if they are prepared to sell them as singles.
3. **All bulls will be subject to the Society’s upset price of 2,000gns.**
4. There will be no transfer fee for bulls or heifers bought at official Society Sales.
5. All Luig Cattle Society Sales are conducted under the National Beef Association terms and conditions of sale incorporating bull breeding and female breeding warranties. To cover the cost of the warranty service detailed on the following page, a charge of £4.00 + vat per bull and £2.00 + vat per female will be split equally between purchaser and seller, applied by the Auctioneer at the point of sale.

HEALTH INFORMATION

Since 2010 all official Luig Cattle Society Sales are run under the same health rules and are therefore BVD-safe. All stock must come from herds which are members of a CHECS approved health scheme and are either BVD accredited free or the sale stock have tested virus negative. Additionally all stock forward are vaccinated against BVD. For herds testing for Johnes’s, the Risk Level categories are displayed and are defined as follows:

Status	Level
Risk Level 1	This is directly equivalent to the previous CHECS Accredited Free status. Level 1 status is associated with the lowest risk source when buying in stock. Health plan required.
Risk Level 2	Herds with level 2 status have had one or two clear consecutive herd tests. Health plan required.
Risk Level 3	Herds with level 3 status have reactors identified at the annual herd test, but these are no more than 3% of animals tested. Health plan required.
Risk Level 4	Herds with level 4 status have reactors identified at the annual herd test, and this amount to more than 3% of the animals tested. Health plan required.
Risk Level 5	Any herd that is not carrying out the required testing or does not have a suitable health plan in place falls into this category. Level 5 status is considered to be the greatest risk source when buying in stock.
