SHOW OF HEIFERS

Lady Anne Memorial Cup

For the best pair of Luing Bulling Heifers

Best Pair of Luing Yearling Heifers

Best Pair of Sim-Luing Heifers

Judge: Mr Ewan Ferguson, Borgh, 9A Loanelkheim, Kiltarlity

Generously Sponsored by:

CATALOGUE

“L” before the Herd Book number indicates Pedigree Luing Male. “P” indicates Pedigree Luing Female. “A” indicates Appendix “A” Female. “B” indicates Appendix “B” Female. P/12345* indicates dam classified, and L/12345# indicates that the sire has passed a breed inspection. All bulls entered have been inspected by the Fieldsman. “SV” after the name indicates that the animal has been sire verified by DNA hair sample. All pedigree information is supplied by the breeder and is deemed to be accurate by the Luing Cattle Society, and all responsibility for accuracy of such information lies with the breeder, and not with the Luing Cattle Society. The Luing Cattle Society operates an online registry at

breeds.grassroots.co.uk/LUING

CONDITIONS OF ENTRY

1. The Sale is conducted under the “General Conditions of Sale” which are exhibited in the Market and in accordance with the Regulations as approved by The Luing Cattle Society Limited.
2. Please note: Stock will be sold as they appear in the ring. Any prospective buyer wishing to purchase one of a pair must consult the vendor prior to them entering the ring to see if they are prepared to sell them as singles.
3. **All bulls will be subject to the Society’s upset price of 2,000gns.**
4. There will be no transfer fee for bulls or heifers purchased at official Society Sales.
5. All Luing Cattle Society Sales are conducted under the National Beef Association terms and conditions of sale incorporating bull breeding and female breeding warranties. To cover the cost of the warranty service detailed on the following page, a charge of £4.00 + vat per bull and £2.00 + vat per female will be split equally between purchaser and seller, applied by the Auctioneer at the point of sale.
6. Levy of 2% to the Luing Cattle Society, will be taken at the point of sale.
7. The sale will be conducted in guineas.

HEALTH INFORMATION

Since 2010 all official Luining Cattle Society Sales are run under the same health rules and are therefore BVD-safe. All stock must come from herds which are members of a CHECS approved health scheme and are either BVD accredited free or the sale stock have individually tested virus negative. Additionally all stock forward are vaccinated against BVD. For herds testing for Johne's, the Risk Level categories are displayed and are defined as follows:

Status	Level
Risk Level 1	This is directly equivalent to the previous CHECS Accredited Free status. Level 1 status is associated with the lowest risk source when buying in stock. Health plan required.
Risk Level 2	Herds with level 2 status have had one or two clear consecutive herd tests. Health plan required.
Risk Level 3	Herds with level 3 status have reactors identified at the annual herd test, but these are no more than 3% of animals tested. Health plan required.
Risk Level 4	Herds with level 4 status have reactors identified at the annual herd test, and this amount to more than 3% of the animals tested. Health plan required.
Risk Level 5	Any herd that is not carrying out the required testing or does not have a suitable health plan in place falls into this category. Level 5 status is considered to be the greatest risk source when buying in stock.

TB REGULATIONS – Buyers are advised to make themselves aware of new TB movement/testing regulations which apply to animals moved into Scotland from elsewhere in the UK. Please visit:

<https://www.gov.uk/government/publications/bovine-tb-pre-movement-and-post-movement-testing-in-great-britain> for exact guidance.

Please note: The Luining Cattle Society accepts health information supplied by the breeder/vendor as being accurate and all responsibility for the accuracy of such information lies with the breeder/vendor and not with the Luining Cattle Society.

NBA BREEDING WARRANTIES

The following points should be noted:

Bull Breeding Warranty

Each bull is sold with the warranty by the vendor that it is capable of getting stock by natural service. This shall be deemed to be fulfilled as soon as six females or 50% of the herd (whichever is the lesser number of the animals put to the bull) are in calf to the bull by natural service subsequent to the sale. The trial period is six months from date of sale or within 6 months of attaining the age of 14 months, whichever is the later.

Female Breeding Warranties

Maiden Heifers: Every maiden heifer over the age of twelve months at the date of sale is sold with warranties by the Vendor

- That it shall be fertile up to the age of twenty-eight months
- That it is not in calf

Females in Calf: Every cow or heifer stated in the Sale Catalogue or by the Auctioneers at the time of the sale to have been served on a date not less than twelve weeks before the date of the sale is sold with warranties by the Vendor

- That it is in calf
- That it is in calf to the bull described in the Sale Catalogue, or by the Auctioneers at the time of the sale
- That the expected calving date will be within a period of 263 to 303 days of the service date

Females with veterinary surgeon's certificate of positive pregnancy diagnosis: Scanning is a matter of opinion and not a warranty. Every cow or heifer stated in the Sale Catalogue or by the Auctioneer at the time of the sale to be sold with a Veterinary Surgeon's certificate of positive pregnancy diagnosis is sold with the same warranties by the Vendor as described for Females in Calf (above). Please note time limits below.

Claims and Time Limits

A claim by a purchaser will only be valid if the purchaser has given notice in writing to the Auctioneers of the intended claim with following time limits:

Bull - Within six calendar months from the date of the sale.

Maiden Heifer or recently served heifer –

- Within three calendar months from the date of the sale or
- Within one calendar month from the date when the heifer attains the age of twenty-eight months whichever is the later date.

Cow or heifer sold as being in-calf or as running with the bull and which proves not to be in-calf:

- Within twenty-eight days from the date of the sale.

Extending the breeding warranty

If it is found impracticable to try the bull/female fairly within the time limits stated, due to the purchaser's normal calving programme, the purchaser shall (at the discretion of the vendor), **ON THE DAY OF THE SALE**, or within the next seven days, give the auctioneer notice **in writing** of the month in which it is proposed to commence using the bull/running the heifers with a bull.

Dingwall and Highland Marts Terms of Sale

General conditions of sale as per institute of auctioneers and appraisers in Scotland guidelines are available in office with specific variations as listed below:

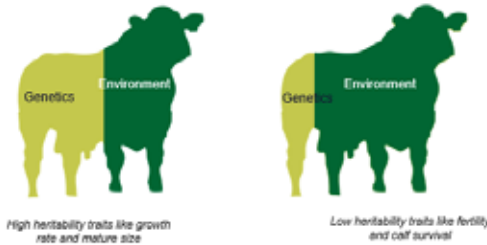

1. All cattle must be ear-tagged and identified separately by means of a large tag, paint mark, glued ticket etc.
2. Should any heifer prove in calf, a claim of one third of the purchase price will have to be refunded to the exposor, or at the purchasers option, the heifer may be returned to the seller who will be refunded the purchase price plus keep and expenses as fixed by the auctioneers. All claims must be notified before calving.
3. Any male calves which have been sold as properly castrated and prove not to have been must be intimated to the auctioneers within 14 days of the date of sale.
4. Any party successfully bidding on a lot will be deemed to be liable for that account unless previously agreed with the management.

It is the duty of all consigners of livestock to notify auctioneers at the point of sale of any withdrawal periods which may apply to the stock they offer for sale. It is a legal requirement that a food chain information declaration be presented with stock. Declarations are available from the main office or via website. Any purchaser wishing to purchase store animals for slaughter please inform the office prior to purchase.

Anyone wishing to purchase on behalf of a third party must inform the management prior to bidding or they will be deemed to be liable for their purchases. Special notice – card payments for livestock purchases carry an industry standard surcharge of 1% on personal debit cards, 1.75% on business debit cards and all credit cards.

ESTIMATED BREEDING VALUES

The pedigree and performance data collected on-farm is analysed using a procedure called BLUP (Best Linear Unbiased Predictor). This calculates how much of each animal's performance is due to its genetics and how much is attributed to the environment in which it was reared. Genetic differences are expressed as Estimated Breeding Values (or EBVs).

Breeding Indexes

Whilst EBVs aid the selection of cattle for specific traits, they can be combined into breeding indexes using economic weightings to meet broader breeding objectives.

- **Calving Value** – Highlights bulls whose calves will be born easily
- **Beef Value** – Identifies superior cattle for growth and carcase traits
- **Maternal Value** – Indicates the best bulls for maternal traits, like milk production and longevity, which are important when breeding female replacements

Accuracy values

An accuracy value is published with every EBV; they indicate how close an EBV is to the animal's true genetic merit. Accuracy values are influenced by the amount of data recorded for an animal and their relatives. Unrecorded cattle will have low accuracy values until their progeny have been performance recorded and this will be reflected in their EBVs.
